

Amendments to the Abstract of the Disclosure:

Please replace the Abstract of the Disclosure section starting at page 58, line 2 and ending at page 58, line 18 with the following replacement section.

All
--A cartridge is detachably mountable to an image forming apparatus and includes a first container, which contains a developer to be supplied into the image forming apparatus and a second container, which is rotatable to feed the developer toward the discharge opening. A developer discharge opening is provided at one longitudinal end of the first container. The second container accommodates a developer collected from the image forming apparatus. The first container is rotatably supported, at the other longitudinal end thereof, by the second container, which is unrotatably engageable with the image bearing member.--
